

Trend Micro™ Communication and Collaboration Security

Protects collaborative communications environments from malware, spam and inappropriate content in real time

Better Together: email, instant messaging, and portals

Business users have come to rely on email and information portals as their communications lifelines. Now, instant messaging has the potential to extend the paradigm further. However, the potential benefits in productivity and efficiency come with new security risks and challenges. Security controls and measures are needed to prevent malicious code, spam, and inappropriate content from threatening business continuity and increasing the risk of litigation. An integrated, comprehensive security approach is needed across all of the communication and collaboration technologies.

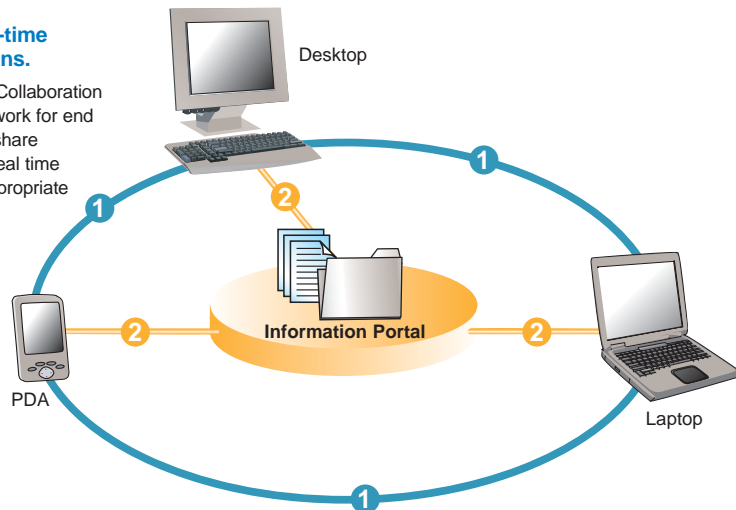

Better Together: end-to-end security for collaborative communications

To protect communications and collaboration environments from malicious code, spam, and inappropriate content, Trend Micro has developed an end-to-end security solution of award-winning products. Trend Micro™ Communication and Collaboration Security includes ScanMail™ for Microsoft™ Exchange™ and Lotus™ Domino™, PortalProtect™ for Microsoft SharePoint™, and Trend Micro™ IM Security for Microsoft™ Office Live Communications Server (LCS). In addition, Trend Micro™ InterScan™ Messaging Security Suite (IMSS) with Spam Prevention Solution (SPS) can be deployed at the gateway to complement ScanMail at the email server and provide multi-layered security. Trend Micro's secure framework for instant messaging, email, and information portals allows people in organizations of all sizes to benefit from increased productivity with one of the lowest impacts on system performance of any comparable solution.

For organizations choosing to build their communications and collaboration infrastructure on Lotus Domino solutions, ScanMail for Lotus Domino provides unparalleled levels of protection across the broadest range of IBM platforms and operating systems in the industry.

End-to-end security for real-time collaborative communications.

Trend Micro Communication and Collaboration Security provides a secure framework for end users in any-size organization to share information and communicate in real time free from viruses, spam, and inappropriate content.

1. Communications security: IM Security for LCS, ScanMail for Exchange or Lotus Domino, IMSS with SPS
2. Collaboration security: Portal Protect for SharePoint

KEY BENEFITS

- **Better together security**
End-to-end security for IM, email, and portal communications stops malware and mitigates legal risk
- **ScanMail**
Blocks malware and inappropriate content at the Exchange or Domino mail server
- **PortalProtect**
Secures Microsoft SharePoint information repositories from malware and inappropriate content
- **IM Security**
Blocks malware and filters inappropriate content from instant messaging communications
- **Gateway Security**
Complementing ScanMail at the email server, IMSS with SPS blocks malware, phishing attacks, and spam at the gateway for multi-layered security

GLOBAL MARKET LEADERSHIP.

No vendor is better suited to protect your business from threats than Trend Micro—the global market leader of Internet gateway, mail server, and file server security according to IDC.

IDC Market Analysis: Worldwide Antivirus 2004-2008 Forecast and 2003 Vendor Shares, August 2004

Trend Micro™ Communication and Collaboration Security

The following products comprise Trend Micro Communication and Collaboration Security to deliver the best protection, performance, and productivity for collaborative communications.

IM Security for Microsoft LCS

Trend Micro™ IM Security for Microsoft™ Office Live Communications Server (LCS) delivers advanced protection from malicious code and inappropriate content. IM Security can be centrally managed and administered, and runs with minimal performance impact to LCS. Incident-based archives support quick and easy searches for content violations. Complete with instant notification through LCS and comprehensive real-time reporting, IM Security helps administrators deploy and maintain a virus-free IM environment with secure content.

ScanMail for Microsoft Exchange or Lotus Domino

Trend Micro™ ScanMail™ delivers award-winning antivirus security to guard against viruses, Trojans, worms, and other malicious code hidden in email attachments. Combines virus protection with anti-spam and advanced content filtering technology. A component of Trend Micro Enterprise Protection Strategy, the centralized management console allows administrators to generate reports, adjust scan settings, set security policy, and deploy outbreak prevention policies—across all Exchange and Domino servers.

PortalProtect for SharePoint

Trend Micro™ PortalProtect™ provides comprehensive virus protection and content filtering for Microsoft SharePoint 2003. It is designed for high performance through tight integration with the Microsoft Virus Scanning Interface (VSI) and delivers optimal security, using Trend Micro ScanMail™ technology—the world's leading antivirus solution for Microsoft Exchange. Support for EPS includes centralized management and reporting; plus, PortalProtect automatically deploys virus definition updates to protect portals from the latest threats.

InterScan Messaging Security Suite with Spam Prevention Solution

InterScan™ Messaging Security Suite (IMSS) blocks malicious code, spam, phishing attacks, and unwanted content at the messaging gateway—the network's most critical entry point. IMSS at the gateway complements ScanMail at the mail server to provide multi-layered protection.

Trend Micro Enterprise Protection Strategy

Trend Micro™ Enterprise Protection Strategy (EPS) is designed to deliver comprehensive protection at both application and network layers to proactively manage the outbreak lifecycle, from vulnerability prevention to malicious code prevention and elimination. Through coordinated delivery of Trend Micro's industry-leading products, services, and threat-specific expertise from TrendLabs™, EPS helps organizations minimize outbreak-related costs and damages.

Trend Micro, Inc.

Trend Micro, Inc. is a global leader in network antivirus and Internet content security software and services, focused on helping customers prevent and minimize the impact of network viruses and mixed-threat attacks through its award-winning Trend Micro™ Enterprise Protection Strategy. Trend Micro has worldwide operations and trades stock on the Tokyo Stock Exchange and NASDAQ.

Trend Micro products are backed by timely, high-quality service from TrendLabs™, a global network of antivirus research and support centers.
