

# Why Choose Trend Micro™ InterScan™ Web Security Suite for your Enterprise?

## Trend Micro™ InterScan™ Web Security Suite

Trend Micro™ InterScan™ Web Security Suite is designed to deliver high-performance Web security at the gateway for HTTP and FTP traffic. Combining award-winning virus protection with anti-phishing, anti-spyware, and optional URL filtering technology, this comprehensive solution scans Web content, downloads, and web-based email and blocks malicious threats — without sacrificing Internet performance.

InterScan Web Security Suite is also highly flexible and scalable, offering LDAP directory integration, granular policy administration, and a variety of deployment models, including ICAP. The suite also supports Trend Micro Control Manager™ and the Trend Micro Enterprise Protection Strategy, extending the benefits of outbreak lifecycle management to Web-based traffic. This integrated solution enables coordinated, enterprise-wide protection against today's newest and most sophisticated threats.

## InterScan Web Security Suite Advantage

**COMPREHENSIVE SECURITY.** InterScan Web Security Suite provides robust protection against viruses, phishing attacks, spyware, and other malicious code entering through the Web gateway, including Web-based email. InterScan Web Security Suite is the ideal complement to messaging gateway security.

**EMPLOYEE INTERNET MANAGEMENT.** With optional URL filtering module, InterScan Web Security Suite can help improve network performance and increase productivity by restricting access to unwanted or inappropriate Web sites.

**HIGH PERFORMANCE.** InterScan Web Security Suite scans and delivers Web content with lower latency for an improved Web-user experience.

**FLEXIBILITY AND SCALABILITY.** InterScan Web Security Suite enables administrators to set a wide variety of scanning and configuration options based on company-specific security needs. InterScan Web Security Suite supports ICAP-compliant solutions from Cisco™, Network Appliance™, and other vendors.

**EASY MANAGEMENT.** InterScan Web Security Suite enables policy-based management, supports external directory services, provides enhanced reporting, and integrates with a centralized management console — for greater ease-of-use.

**LOWER COST OF OWNERSHIP.** InterScan Web Security Suite can lower an organization's security costs and complexity by addressing its entire gateway web security needs in one solution. Centralized, policy-based management tools make it easier to tailor web security policies based on the needs of unique users or groups. And annual maintenance costs are also much lower with InterScan Web Security Suite than with "competing" products.

**RELIABILITY FROM THE PROVEN MARKET LEADER.** More businesses rely on Trend Micro for their gateway security needs than any other vendor\*. Why settle for second best?

## KEY PRODUCT FEATURES

- Comprehensive Web security
- Leading virus protection
- Reliability from the gateway market leader\*
- Anti-phishing
- Anti-spyware
- Optional URL filtering module

“ Integrating multiple products to enforce acceptable Web use and security policy for all outbound browser-based traffic is a major pain point for organizations. We expect Web gateway tools, such as URL filtering, antivirus, anti-spyware, and active content control tools, will merge in major vendor platforms to simplify implementation of secure Internet access. ”

—Peter Firstbrook  
Program Director  
for META Group  
June 2004

# Why Choose Trend Micro™ InterScan™ Web Security Suite for your Enterprise?

## Product Comparison

A handful of other security products from the companies listed in the table below appear to have a few similarities with InterScan Web Security Suite. While this is partially correct, InterScan Web Security Suite is the only solution that has

been designed to provide a comprehensive solution against different types of web-based threats. Compared with other products, an integrated product that can be centrally managed gives you the lowest cost, least hassle solution.

## Trend Micro vs. Blue Coat™, Symantec™, McAfee™, Websense™, and Surfcontrol™

Top Security Requirements	Gateway Web Security					
	Trend Micro InterScan Web Security Suite	Blue Coat™ Proxy AV Proxy SG	Symantec™ Web Security	McAfee™ Webshield	Websense™ Enterprise	Surfcontrol™ Web Filter
Outbreak Prevention Services	Yes	No	Not threat-specific	Not threat-specific	No	No
Security Expertise	Yes	No	Yes	Yes	No	No
Integrated Platform (AV, CF, URL)	Yes	Yes (aggregated third-party model)	Yes	No	No	No
